

Ringwood Natural History Society

Anderwood Inclosure Walk and Sausage Sizzle

Date: 13th July 2017
 Walk Leader: Martin King
 Weather: Cloudy spells becoming warm and sunny
 Temperature: 19-22 degrees
 Attendees: 19 on walk, 62 at Sausage Sizzle

We started our walk from Anderwood car park and barbecue site near Burley in the heart of the New Forest National Park, the site is managed by the Forestry Commission. Our short walk took us through the inclosure created in 1811 and consists of both broadleaf and conifer trees of variable ages. Nestled in the trees the shady car park is the perfect spot to enjoy the well attended annual Sausage Sizzle whilst listening to the sights and sounds of woodland wildlife all around.

Flowering Plants, etc.	Grasses etc.	Birds	Butterflies
