

RINGWOOD NATURAL HISTORY SOCIETY

Wilverley Walk

Date: 19th November 2024
Weather: Rain
Walk Leaders: Maz and Will Russell
Attendees: 12

We met at Wilverley Car Park for a walk around Wilverley Inclosure which consists of a mixture of broadleaf and conifer trees. We started from the large grassy area of lawn of Wilverley Plain favoured by New Forest ponies. It was a miserable wet day, we entered the inclosure and followed the waymarked trail around the inclosure. Unfortunately not much was seen due to the conditions. Not far from the access gate there is a Victorian cast iron marker plate, it depicts the inclosure's history, a photo giving the details is shown below.

Birds	Fungi
Blue Tit	Turkeytail
Greenfinch	Oysterling sp.
Nuthatch	Birch Polypore
Robin	Sheathed Woodtuft
Blackbird	
Herring Gull	Mammals
Buzzard	Grey Squirrel
Goldcrest	
Great Tit	
Carrion Crow	
Wood Pigeon
